Description

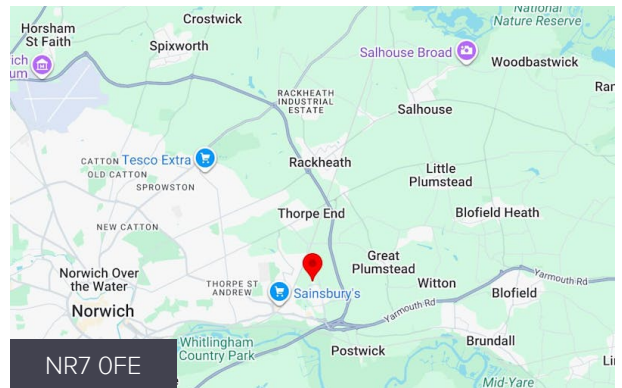

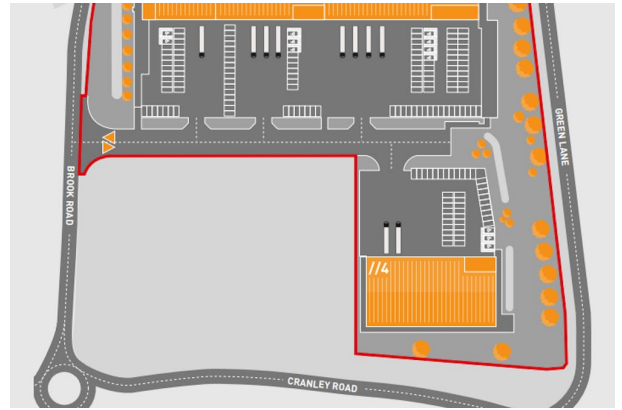

The Tungsten scheme at Norwich presents a rare opportunity to secure high-quality, purpose-built industrial and logistics accommodation within a well-established commercial location.

Currently proposed as a draft scheme, the development is subject to planning and offers prospective occupiers and purchasers an opportunity to engage at an early stage. This allows for potential input into specification and configuration, ensuring that the finished units can align closely with specific operational requirements.

Comprising four modern units ranging from approximately 14,800 to 31,700 sq ft, the scheme is designed to accommodate a range of occupier requirements. The buildings prioritise operational flexibility, with clear-span warehouse space, integrated office accommodation, and layouts suitable for a variety of industrial and logistics uses. Availability on both a freehold and leasehold basis further enhances the scheme's appeal to both owner-occupiers and investors.
