Description

A detached HQ style building awaiting refurbishment. The unit was originally built in 1990. The unit benefits from 6.25m eaves height in the main warehouse (5.35m clear internal height) and 7.4m eaves height (6.4m clear internal height) in the extension. One loading door has been installed in the side elevation and two storey offices run along the front of the unit. There are currently two mezzanine floors in situ which are earmarked for removal as part of the dilapidations / refurbishment process. Parking is provided at the front of the property and loading sits at the side of the unit, with a separate access from the road.

We understand the unit has a current power supply of 300kVA but historically the building has had a larger supply. The landlord is investigating the steps required to reinstate the larger supply, which could be up to 1 MVA. Once refurbished the property will be available for rent on a new lease.
